

PASTURE BLENDS

Pasture blends should be designed for your soils, moisture availability, and your desired uses. We can modify the basic blends to suit your particular needs. Recommended application rate for new pasture blends is 25-35 lbs per acre. Overseeding rate is 10-15 lbs per acre.

Traditional Flood Irrigated Pasture

30% Orchardgrass	Potomac
20% Perennial Ryegrass	Tonga
20% Annual Ryegrass	Gulf
20% Tall Fescue	Fawn
10% White Clover	Dutch

Less Frequently Irrigated Pasture

20% Crested Wheatgrass	Hycrest
20% Tall Fescue	Fawn
20% Intermediate Wheatgrass	Reliant
15% Orchardgrass	Paiute
10% Smooth Bromegrass	Carlton
10% Western Wheatgrass	VNS
5% Alfalfa	Ladak

Dryland Pasture Blend #1

(Establishment plus infrequent additional moisture)

40% Intermediate Wheatgrass	Reliant
30% Crested Wheatgrass	Hycrest
25% Smooth Bromegrass	Carlton
5% Perennial Ryegrass	Tonga

Dryland Pasture Blend #2

(Establishment with no additional moisture)

40% Crested Wheatgrass	Hycrest
30% Thickspike Wheatgrass	Critana
30% Russian Wildrye	Bozoisky
